

Cable drum transport devices

342

Cable drum trailers 1.0 - 2.7 t with accessory

Cable drum trailers hydr. loading 3.5-9.0 t, 80 km/h

Cable drum trailers hydr. loading 4.6-9.0 t, 25 km/h

Accessory for cable drum trailers hydraulic loading

Cable drum trailers winch loading 3.5-9.0 t, 80 km/h

Cable drum trailers winch loading 4.6-9.0 t, 25 km/h

Accessory for cable drum trailers winch loading

Trailers for poles and long goods 1-4 t

Cable trailer straight or adjustable drawbar

Cable drum trailer with straight or height adjustable draw bar and overrun brake for speeds up to 80 km/h. For loading the support arms are swung down and then raised picking up the drum by a single hand winch. Rigid tubular steel shaft D 76 mm. Rotating alu-shaft D 75 mm as accessory. Further accessory see below.

- Types G - with straight draw bar can only be equipped with ball coupling
- Types H - with adjustable draw bar equipped with eye coupling, ball coupling as accessory
- Suitable for one-man operation
- Complete trailer hot galvanized
- Rotating alu shafts as accessory, see below.
- Drum band brake as accessory, see below.

Cable trailer adjustable drawbar

Cable drum trailer with height adjustable draw bar with eye coupling and overrun brake for speeds up to 80 km/h. Drums are vertically lifted for transport by two hydraulic jacks operated by a central hand pump or by motorized hydraulic used as an accessory. Rigid tubular steel shaft D 76 mm. Rotating as accessory. Further accessory see below. Techn. Details see below.

- Trailers with height adjustable draw bar are equipped with eye coupling, ball coupling as accessory.
- Through stub axles the trailer is open to the rear for receiving the cable drum.
- Big ground clearance through long lift hydraulic jacks.
- According to guide line 70/221 EWG the trailers have to be equipped with rear protection gates
- Special painting as accessory, Code 350.980, KSL

Code	Type	Total/Payload	Drum-D	Hitch load	Int./Ext. width	kg

349190	PK 25	KVH 2.6/80 A	3500 kg	2,90

Rotating steel drum shafts

Surcharge for rotating drum shafts. All a.m. trailers are fitted with rigid tubular steel drum shafts. With rotating shafts cable drums unwind much easier, they are necessary if the trailer is equipped with a drum drive or a drum disc brake.

- The cones are with stages for all drum holes from diam. 80-140 mm.
- If no drum disc brake is necessary the use of below mentioned light alu drum shaft is recommended.

350790	APR 690	KVH 2.6-4.6/FZB 2550	76/10/1888 mm	44,00

Rotating alu drum shafts

Surcharge for rotating aluminium drum shaft. Instead of the steel shafts this aluminium drum shaft with mounted rotating bearings can be used. It is much lighter than the steel shaft. It is also suitable for all hydraulic drum drives, but not for the drum disc brake.

Code	Type	Suitable for	D/length	kg
35079075	APR 755	KVH 2.6-5.3/FZB 2550	75/1888 mm	34,00

Cable drum disc brake

Cable drum disc brake with drum fork for controlled unwinding of cable or line drums. Hand mechanical setting of the braking force. To use it with KVH-types code 350.790 APR 690 is necessary.

Code	Type	Operation	Braking	At the cable	kg
350860	STB 400	mechanic	3200 Nm	approx. 400 daN	46,00

Cable drum drive for KVH 2.6/80A

Cable drum drive for cable drum trailer KVH 2.6/80, driven by an external hydraulic drive e.g. from the lorry, or by a separate petrol-hydraulic power pack, mount- or dismountable on the trailer, see below code 351.330, THF 203. (The hydr. power pack may not be mounted permanently on the trailer because the hitch load would be too high, so during transportation it has to be dismantled.)

Cable trailer adjustable drawbar

Cable drum trailer with height adjustable draw bar with eye coupling and overrun brake. Tandem axle for speeds up to 80 km/h. Drums are lifted for transport by two swung arms hydraulic operated by motorized hydraulic included drum drive as an accessory. Rigid tubular steel shaft D 76 mm. Rotating as accessory. Further accessory see below.

- Very robust welded construction, complete hot galvanized.
- Through tandem axle even distribution of the total weight on each wheel.
- Drum lifting arms operated by double action hydraulic jacks.

Protection for petrol engine

Protection of metal sheet for petrol engine of cable drum drives, folding and lockable, without padlock.

Code	Type	Suitable for	kg
351598	BVB 400	TVB 400 petrol engine	10,00

Trailer for subducts and cable drums

Trailer for subduct drums. Also prepared for transporting cable drums. With height adjustable draw bar with eye coupling and overrun brake. Tandem axle for speeds up to 80 km/h. Subduct drums or cable drums are lifted for transport by two swung arms hydraulic operated by motorized hydraulic included drum drive as an accessory. For transporting and unwinding of subducts the suspension ZGH 7/120 for up to 7 subduct drums is necessary. See accessory below.

- Very robust welded construction, complete hot galvanized.
- Through tandem axle even distribution of the total weight on each wheel.
- Drum lifting arms operated by double action hydraulic jacks.
- Attention: please see mobile drum unwinding stand code 344.100 TRG 8120

Cable trailer hydraulic loading, 80 km/h

Cable trailer hydraulic loading for lorry transport up to 80 km/h. Drums are vertically lifted for transport by two hydraulic jacks operated by central hand pump or by motorized hydraulic which can also drive the drum, as an accessory. Rigid tubular steel shaft D 76 mm. Rotating as accessory. If smaller drums than mentioned below have to be transported or wound, please select as accessory one of the below shown small drum suspension KVZ 180 or drum support TAV 080. Further accessory see below.

- With air brakes for speed up to 80 km/h. ABS as accessory.
- Through stub axles the trailer is open to the rear for receiving the cable drum.
- Big ground clearance through long lift hydraulic jacks.
- Type KVH 7,0/80 available with bigger internal/external width of 1900/2750 mm, see table.
- According to guide line 70/221 EWG these trailers have to be equipped with rear side protection gates
- Special painting as accessory, Code 350.980, KSL

Cable trailer hydraulic loading, 25 km/h

Cable trailer hydraulic loading for lorry transport up to 25 km/h. Drums are vertically lifted for transport by two hydraulic jacks operated by central hand pump or by motorized hydraulic which can also drive the drum, as an accessory. Rigid tubular steel shaft D 76 mm. Rotating as accessory. If smaller drums than mentioned below have to be transported or wound, please select as accessory one of the below shown small drum suspension KVZ 180 or drum support TAV 080. Further accessory see below. Techn. details see below.

- Types ../25A with overrun brake, types ../25D with air brake for speed of 25 km/h
- Through stub axles the trailer is open to the rear for receiving the cable drum.
- Big ground clearance through long lift hydraulic jacks.
- Types KVH 7,4/25 and 9,4/25 available with bigger internal/external width of 1860/2750 mm.
- According to guide line 70/221 EWG these trailers have to be equipped with rear protection gates

Drum drives standard

Cable drum drive both sides, with engine on the trailer for all cable trailers KVH 3,5-9,0.

- Hydraulic drive by hydraulic engines on the trailer
- Pulling force on cable depending on drum diameter up to approx. 500 daN.
- Wind- and unwinding speed approx. 0-50 m/min.
- TBL + TDL 502 available as retrofitting part, for mounting on customers equipment, see pdf-drawing on the left.
- Type TDHE 502 diesel engine with electro starter.

Code	Type	Drive of	Engine kW	kg

Drum drive with radio control

Cable drum drive and drum lifting, diesel engine with electric starter and hydraulic power pack on the trailer. Incl. radio control for all cable trailers KVH 3.5-9.0.

Radio control consisting of light mobile transmitter and receiver on the trailer. Control command of drum loading individual left or right, and drive of the drum for winding or unwinding.

- Hydraulic drive by Hatz diesel engine with electric starter on the trailer.
- Pulling force on cable depending on drum diameter up to approx. 500 daN.
- Wind- and unwinding speed approx. 0-50 m/min.
- Radio control for drum lifting/lowering individual left/right, winding and unwinding.

Code	Type	Drive of	Engine kW	kg

Drum drives for external hydraulic

Cable drum drive for external hydraulic connection of the towing vehicle. For all cable trailers KVH 3,5-9,0.

- Hydraulic drive supplied by the towing vehicle
- Pulling force on cable depending on drum diameter up to approx. 500 daN.
- Wind- and unwinding speed approx. 0-50 m/min.
- Type TZL 502 available as retrofitting part, for mounting on customers equipments, see pdf-drawing on the left.

Cable trailer winch loading, 80 km/h

Cable drum trailers for lorries up to 80 km/h. The Cable drum is pulled and mounted onto the trailer for transport using two hand winches. These can also be optionally equipped with hydraulic drive which can be combined with the cable drum drive. All KVS-types are fitted with a rotating steel tube drum shaft D 76 mm. Further technical details and accessory see below.

- With air brakes for speed up to 80 km/h. ABS as accessory.
- Through stub axles the trailer is open to the rear for receiving the cable drum.
- Drum loading in any terrain through individual controlled rope winch.
- Type KVS 7,0/80 available with bigger internal/external width of 1900/2750 mm, see table.
- According to guide line 70/221 EWG these trailers have to be equipped with rear and side protection gates
- Special painting as accessory, Code 350.980, KSL

Cable trailer winch loading, 25 km/h

Cable drum trailers for lorries up to 25 km/h. The Cable drum is pulled and mounted onto the trailer for transport using two hand winches. These can also be optionally equipped with hydraulic drive which can be combined with the cable drum drive. All KVS-types are fitted with a rotating steel tube drum shaft D 76 mm. Further technical details and accessory see below.

- Types ../25A with overrun brake, types ../25D with air brake for speed of 25 km/h
- Through stub axles the trailer is open to the rear for receiving the cable drum.
- Drum loading in any terrain through individual controlled rope winch.
- Types KVS 7,4/25D and 9,25D available with bigger internal/external width of 1860/2750 mm, see table.
- According to guide line 70/221 EWG these trailers have to be equipped with rear and side protection gates
- Special painting as accessory, Code 350.980, KSL
